## Patient Safety and Quality

Edgewater can help you integrate quality data with operational and financial for unique insight

### Challenges

- ▶ Multiple definitions of safety and quality measures
- ▶ Too much time finding and collecting data
- ▶ Static reports don't enable action from clinical leaders
- ▶ Difficult to integrate and analyze existing measures
- ▶ Technical architecture doesn't scale to accommodate future measures, internal and external requirements
- ▶ Can't integrate finance and operations with quality

You need a solution designed and built using a proven approach with a track record of success!

### Analytic Subject Area: Quality

#### CMS Core Measures

Infection Control

Patient Safety

JCAHO

P4P

Benchmarks

Process Metrics

Order Sets

Other Quality Measures

#### Sample Analytic Questions

- ▶ Are we achieving our performance targets for core measures across facilities and care settings?
- ▶ Is there a relationship between achieving quality targets and reducing the total cost of care?
- ▶ Have we reduced complications through better attainment of core quality measures? Has this favorably impacted our cost reduction initiatives?
- ▶ Have we maintained quality while achieving our growth targets?
- ▶ What is our projected performance against P4P measures?

### Anticipated Value and Benefits

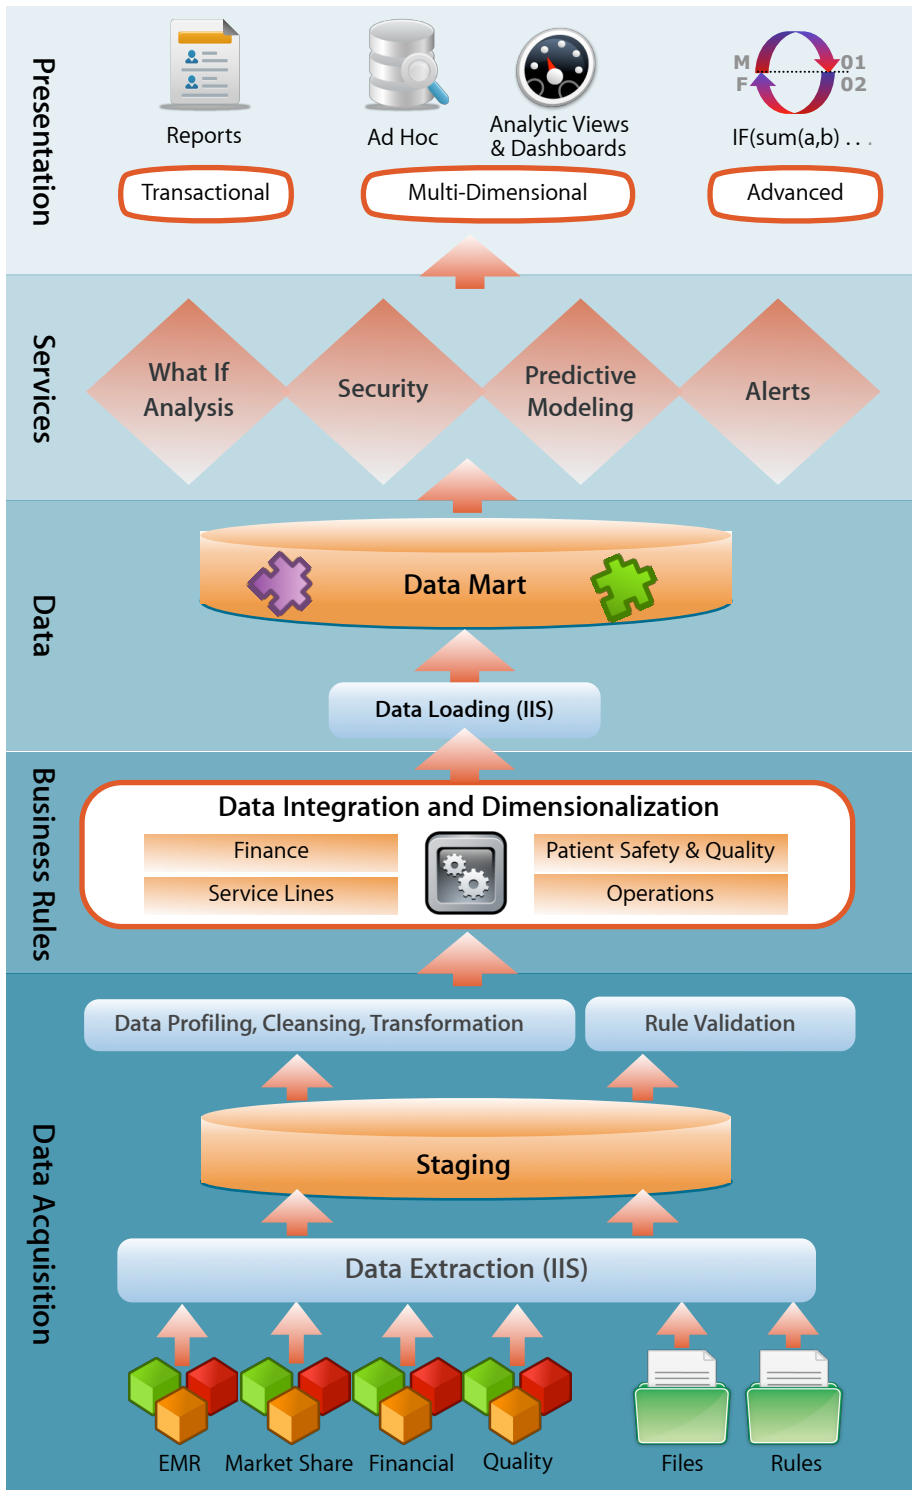

- ▶ Evaluate enterprise, service line, clinical team, physician performance against core quality measures.
- ▶ Identify pockets of under-performance for focused corrective actions; or over-performance for potential characterization for best practices.
- ▶ Evaluate adherence to, coverage, utilization and vitality of standard order sets on focused disease conditions.

# Healthcare

## Patient Safety and Quality

- ▶ Leverage your existing presentation tools

- ▶ Enhance existing protocols  
Enhanced modeling capabilities, security protocols, predictive scenario analysis, and alert notification via text, page, phone, email, or computer prompts

- ▶ See your data  
Dimensionalize your data to see it by:
  - Facility --> Service Line --> Department --> Room
  - Physician --> Specialty
  - Payer Mix --> Reimbursement Rates

- ▶ Business rules for any measure you want to analyze

- ▶ Integrate ALL of your data
  - Clinical
  - Quality
  - Financial
  - Operational
  - Research
